

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Payden Sterling Reserve Fund (the “Fund”)

Payden Sterling Reserve Fund – Sterling Class (Accumulating) (ISIN:IE00B5LJ3F63)

A sub-fund of Payden Global Funds public limited company (the “Company”)

The Manager is Waystone Management Company (IE) Limited (the “Manager”)

Objectives and investment policy

The Fund seeks to provide capital security, liquidity and income through investment in Sterling denominated investment grade debt securities. The Fund aims to maintain an AAAF rating from Fitch rating agency.

The investment manager will actively select, purchase and sell securities with the aim of meeting the investment objectives of the Fund.

The Fund will invest primarily in debt securities issued by governments, government agencies, supnationals (e.g. the World Bank) and corporations.

The Fund may invest significantly in deposits and/or money-market instruments and may also invest in mortgage backed and asset backed securities.

The Fund may use derivatives with the aim of managing interest rate risk. The Fund may also use derivatives for both hedging purposes and for taking investment positions. These may include short positions where the Fund seeks to benefit from the sale of an asset that it does not physically own.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 6 months.

Your shares are accumulating, meaning that income and gains of the Fund will be reinvested to increase the value of the Fund.

Your shares are denominated in Sterling, the Fund’s base currency. It is expected that the Fund will invest exclusively in base currency-denominated securities.

Shares can normally be bought and sold on any business day, being a day on which banks are open for business in Ireland, the UK and the US.

The Fund is actively managed with reference to the ICE BofA SONIA Overnight Rate Index (the “Index”) by virtue of the fact that it uses the Index for performance comparison purposes. The investment manager has discretion over the composition of the Fund. Whilst the investment manager does not employ a defined strategy to align with a benchmark during periods of volatility, it will take account of market environment and perceived risks at any given time and will employ its investment discretion as described in the investment policy accordingly.

For more information about the investment policy of the Fund, please see the section of the prospectus titled “Investment Objectives and Policies”.

Risk and reward profile

The risk indicator was calculated using historic fund returns and may not be a reliable indicator of the risk profile of the Fund.

The risk category shown is not guaranteed and may change over time. The lowest category does not mean your investment is ‘risk free’.

The Fund is rated 2 because of the low level of risk due to the nature of its investments in debt instruments. The following risk factors may give rise to performance volatility and may expose the Fund to losses: (i) the value of the Fund will rise as bond yields generally fall but will fall in the event that bond yields generally rise and; (ii) changes in the perceived credit worthiness of bond issuers will contribute to performance volatility.

A fall in credit worthiness will generally lead to a fall in the value of the Fund and vice versa.

The risk indicator is measured on a share class basis. Where share classes of the Fund have temporarily differing risk indicators, the representative share class will show the higher risk category.

Material risks not adequately captured by the risk indicator include:

Counterparty risk: The insolvency of any institutions providing services such as custody or acting as counterparty to any transaction may expose the Fund to financial loss, including counterparties to derivatives and foreign exchange trades.

Credit risk: An issuer may fail to repay income or capital in full, leading to a financial loss for the Fund.

Liquidity risk: There may be some circumstances in which the ability to sell certain assets at little cost will be impaired.

Derivative Risk: Gains and losses from the use of derivatives may be greater than where the underlying investment is purchased directly by the Fund.

Operational Risk: There may be risks associated with the safekeeping of the assets by the Depositary and sub-custodians.

For more information about risks please see the section of the prospectus titled “Risk Warnings”.

Charges

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	Up to 3.00% of NAV
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charge (capped*)	0.18%
Charges taken from the fund under certain specific conditions	
Performance fee	None

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The ongoing charge figure is based on expenses for the year ending 31 December 2023. It excludes portfolio transaction costs.

*This figure may vary from year to year but will not be more than the capped rate currently set at 0.18%.

For more information about charges, please see the section of the prospectus titled "Charges and Expenses".

Past performance

*In January 2022, the index displayed in the chart was changed to the ICE BofA SONIA Overnight Rate Index

Past performance is not a guide to future performance. The past performance calculation does not take into account the entry and exit charges but does take into account the ongoing charges referred to above. The value of your investment may go down as well as up and you may not get back the amount you invested.

The chart shows the Fund's annual performance in Sterling for each calendar year over the period displayed. The performance of the share class is not tracking the index in the chart.

The Fund was approved by the Central Bank of Ireland in 2010 and this share class launched in 2010.
