

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Payden Global Short Bond Fund (the “Fund”)

Payden Global Short Bond Fund – US Dollar Class Unhedged (Distributing) (ISIN:IE000HQKC4V3)

A sub-fund of Payden Global Funds public limited company (the “Company”)

The Manager is KBA Consulting Management Limited (the “Manager”)

Objectives and investment policy

The Fund seeks to achieve income and growth through investment primarily in investment grade debt securities, of issuers mostly based in Europe (both EU and non EU member states), United States, Canada, Australia, New Zealand and Japan.

The investment manager will actively select, purchase and sell securities with the aim of meeting the investment objectives of the Fund.

The Fund will invest primarily in investment grade debt securities issued by governments, government agencies, supranationals (e.g. the World Bank) and corporations. The Fund may also invest in below investment grade securities.

The Fund may also invest in money-market securities and mortgage-backed and asset-backed securities.

The Fund may use derivatives with the aim of managing interest rate and currency risk more efficiently.

The Fund may also use derivatives for both hedging purposes and for taking investment positions. These may include short positions where the Fund seeks to benefit from the sale of an asset that it does not physically own.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 12 months.

Your shares are distributing, meaning that income of the Fund will ordinarily be paid to investors.

Your shares are denominated in US Dollars, the Fund’s base currency. Assets held by the Fund which are denominated in a currency other than the base currency will typically not be hedged to the base currency. Shares can normally be bought and sold on any business day, being a day on which banks are open for business in Ireland, the UK and the US.

The Fund is actively managed with reference to the FTSE World Government Bond Index 1-3yr (USD Unhedged) (the “Index”). The Index is used (i) as a universe from which to select or hold securities; and (ii) to measure performance of the Fund. The investment manager has discretion over the composition of the portfolio of the Fund and may select securities not included in the Index. Both in-Index and out-of-Index securities may be used, and deviations from the Index may be significant. Whilst the investment manager does not employ a defined strategy to align with a benchmark during periods of volatility, it will take account of market environment and perceived risks at any given time and will employ its investment discretion as described in the investment policy accordingly.

For more information about the investment policy of the Fund, please see the section of the prospectus titled “Investment Objectives and Policies”.

Risk and reward profile

The risk indicator was calculated using historic fund returns, adjusted to reflect the open currency exposures of this unhedged share class. Historic returns may not be a reliable indicator of the risk profile of the Fund.

The risk category shown is not guaranteed and may change over time. The lowest category does not mean your investment is ‘risk free’.

The Fund is rated 3 because of the medium level of risk due to the nature of its investments in debt instruments. The following risk factors may give rise to performance volatility and may expose the Fund to losses: (i) the value of the Fund will rise as bond yields generally fall but will fall in the event that bond yields generally rise; (ii) changes in the perceived credit worthiness of bond issuers will contribute to performance volatility. A fall in credit worthiness will generally lead to a fall in the value of the Fund and vice versa; and (iii) the assets held by the Fund which are denominated in a currency other than the base currency are mostly not hedged back to the base currency.

Material risks not adequately captured by the risk indicator include:

Counterparty risk: The insolvency of any institutions providing services such as custody or acting as counterparty to any transaction may expose the Fund to financial loss, including counterparties to derivatives and foreign exchange trades.

Credit risk: An issuer may fail to repay income or capital in full, leading to a financial loss for the Fund.

Liquidity risk: There may be some circumstances in which the ability to sell certain assets at little cost will be impaired.

Derivative Risk: Gains and losses from the use of derivatives may be greater than where the underlying investment is purchased directly by the Fund.

Operational Risk: There may be risks associated with the safekeeping of the assets by the Depositary and sub-custodians.

For more information about risks please see the section of the prospectus titled “Risk Warnings”.

Payden & Rygel Global Limited, the investment manager of the Fund, is authorised and regulated by the UK Financial Conduct Authority.

Charges

One-off charges taken before or after you invest	
Entry charge	0.00%
