

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Payden Global Emerging Markets Bond Fund (Hard Currency) (the “Fund”)

Payden Global Emerging Markets Bond Fund (Hard Currency) - US Dollar Class (Accumulating) (ISIN:IE00BHX5Q577)

A sub-fund of Payden Global Funds public limited company (the “Company”)

The Manager is KBA Consulting Management Limited (the “Manager”)

Objectives and investment policy

The Fund seeks to maximise total return. The performance of the Fund will be measured relative to the J.P. Morgan EMBI Global Diversified Index (the “Index”). The Fund may invest in a wide variety of securities which may be: (i) below investment grade (ii) investment grade; and/or (iii) income-producing. Investments will typically comprise of Emerging Markets debt securities, corporate bonds and government securities.

In normal market conditions, the Fund will invest at least 80% of its Net Asset Value in government securities of Emerging Markets (or economically linked with securities of Emerging Markets), and securities of corporations organised or headquartered in Emerging Markets.

The Fund is actively managed, meaning, the investment manager will actively select, purchase and sell securities with the aim of meeting the investment objectives of the Fund. The Index does not define asset allocation of the Fund & depending on market conditions the Fund may deviate significantly from the Index.

The Fund may use derivatives for hedging purposes, efficient portfolio management and/or investment purposes. Derivatives (including forward currency contracts, currency futures, currency options and currency swaps) may be used for hedging currency risks associated with underlying assets denominated in a non-base currency. These may include short positions where the Fund seeks to benefit from the sale of an asset that it does not physical own.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Your shares are accumulating, meaning that income and gains of the Fund will be reinvested to increase the value of the Fund.

Your shares are denominated in US Dollars, the Fund’s base currency.

Shares can normally be bought and sold on any business day, being a day on which banks are open for business in Ireland, the UK and the US.

The impact of portfolio transaction charges are likely to be material due to the strategy adopted by the Fund. Such costs are paid from the assets of the Fund in addition to the ongoing charges set out below.

The Fund is actively managed with reference to the Index. The Index is used (i) as a universe from which to select or hold securities; and (ii) to measure performance of the Fund. The investment manager has discretion over the composition of the portfolio of the Fund and may select securities not included in the Index. However, in normal market circumstances, whilst it is expected that a significant portion of the Fund’s constituents will also be Index constituents, deviations from the Index may be material. Whilst the investment manager does not employ a defined strategy to align with a benchmark during periods of volatility, it will take account of market environment and perceived risks at any given time and will employ its investment discretion as described in the investment policy accordingly.

For more information about the investment policy of the Fund, please see the section of the prospectus titled “Investment Objectives and Policies”.

Risk and reward profile

The risk indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk category shown is not guaranteed and may change over time. The lowest category does not mean your investment is ‘risk free’.

The Fund is rated 5 because of the medium level of risk due to the nature of its investments in debt instruments. The following risk factors may give rise to performance volatility and may expose the Fund to losses: (i) the value of the Fund will rise as bond yields generally fall but will fall in the event that bond yields generally rise; (ii) changes in the perceived credit worthiness of bond issuers will contribute to performance volatility. A fall in credit worthiness will generally lead to a fall in the value of the Fund and vice versa; and (iii) the assets held by the Fund which are denominated in a currency other than the base currency can be held hedged or unhedged, thereby currency risks will not be eliminated.

Material risks not adequately captured by the risk indicator include:

Counterparty risk: The insolvency of any institutions providing services such as custody or acting as counterparty to any transaction may expose the Fund to financial loss, including counterparties to derivatives and foreign exchange trades.

Credit risk: An issuer may fail to repay income or capital in full, leading to a financial loss for the Fund.

Liquidity risk: There may be some circumstances in which the ability to sell certain assets at little cost will be impaired.

Derivative Risk: Gains and losses from the use of derivatives may be greater than where the underlying investment is purchased directly by the Fund.

Emerging Market Risk: Emerging economies may exhibit higher levels of investment risk.

Operational Risk: There may be risks associated with the safekeeping of the assets by the Depositary and sub-custodians.

For more information about risks please see the section of the prospectus titled “Risk Warnings”.

Payden & Rygel Global Limited, the investment manager of the Fund, is authorised and regulated by the UK Financial Conduct Authority.

Charges

One-off charges taken before or after you invest	
Entry charge	N/A
Exit charge	Up to 3.00% of NAV
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charge (capped*)	0.63%
Charges taken from the fund under certain specific conditions	
Performance fee	None

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The ongoing charge figure shown is an estimate of the charges as there is insufficient historical data. The Fund's annual financial report for each financial year will include details of the exact charges made. It excludes portfolio transaction costs.

*This figure may vary from year to year but will not be more than the capped rate currently set at 0.63%.

For more information about charges, please see the section of the prospectus titled "Charges and Expenses".

Past performance

The US Dollar Class (Accumulating) launched in 2022 and as such there is insufficient data to provide a useful indication of past performance to investors. The value of your investment may go down as well as up and you may not get back the amount you invested.

The Fund was approved by the Central Bank of Ireland in 2019 and the share class launched in 2022.
